School of Medicine's Department of Pharmacology and Toxicology and VCU Health Department of Pharmacy. In pharmacy education, library used to do appear independent contributions to desirable outcomes of the institution. Librarian's role is also important to make students information literate. This objective of this study to know about the role of libraries and library professionals experience in pharmacy colleges. The data represent responses from 44 library professionals during the period 2013-2014 to the questionnaire [4,5,6,7]. To explore role of libraries in pharmacy colleges, current status on collections and digital library facilities are discussed and to know the perceptions of library professionals, their job satisfaction level satisfaction. Pharmacy colleges of this study have enough conventional collections, but latest modern technology like connecting network, security measures are to be developed. Since pharmacy graduates get involved in clinical aspects, drug information resources, learning tools and materials and databases for clinical aspects are also required in library. All library professionals in this study are satisfied.

2. METHODOLOGY:

Libraries are social institutions created to safeguard knowledge, preserve the culture heritage and provide information for education and research purpose to different users. According to elaturoti (1990), school library can be defined as an area designed for of all types of learning and teaching resources. Oniovosa (2004) notes that, in asurya around the world on the reading ability ofs the children that, one of the factors that positively influence children's reading attainment is the availability and accessibility of books and other non book resources in their immediate surrounding, at home, in the classroom and in the library[8,9,10]. Accessibility and utilization of library information resources are key factors in the provision of quality services in different types of libraries. Abdullahi (1998) adds that usefulness of a library depends upon its proper organization which includes the accessibility and availability of information resources, their arrangement, the situation of the library, etc. Moreover, Bhatt (2013) asserted that the successful library services depend mainly on satisfaction level of its users with the relevant library information resources, user-centric library services and library staffs' supportive attitude.

Flow Chart

3.CONCLUSION:

In present scenario readers and educated depend electronic devices like computer ,electronic cells, e – news papers for getting of current knowledge acquiring through e-inyernet system.more over for the sake of students most of the professional colleges providing internet facility for acquiring of knowledge trough system only.and along with news papers and employment new papers also also

provide lot of information coming for updated information available day to day.
