## TRENDS IN LIBRARY AND INFORMATION SCIENCE RESEARCH IN KARNATAKA STATE UNIVERSITIES

**Dr. Rishi Tiwari**

Head Librarian , Birla Institute of Management Technology  
Greater Noida, Uttar Pradesh.

### ABSTRACT

*In the present paper an endeavor has been made to perceive the examination skims in Library and Information Science. Attempts were made to consider the different research fields completed in advancing past and the devotion of the select State Universities in the Karnataka State. It has been seen that Karnataka University produced the most stunning number of Ph.D theses, i.e., 94 with 33.57%. It is seen that a broad piece of the Universities given best need to Information and Communication progression.*

**Keywords**— *Research in Library Science, Research in Information Technology, Research in Bibliometrics.*

### INTRODUCTION

Libraries assume a critical job in the development and improvement of present day society. The significance of their job is by and large progressively figured it out. With the end goal to satisfy the desire, libraries must be produced along appropriate lines. The exploration in LIS in the past was considered fundamentally to give a hypothetical establishment to proficient practice. The pace of library look into is grabbing wherever today because of social weight, and in addition, motivation.

Karnataka University Dharwad presented Ph.D program without precedent for the year 1974 in Karnataka which was special at the college level. Prof. M.R. Kumbhar who was notable as a "Boss of the reason" was for the most part in charge of beginning this program. He had incredibly attempted to draw out some remarkable research commitments in the order. Likewise this new and sincere program pulled in a few driving LIS educators and bookkeepers. From there on all the rest of the colleges, for example, Bangalore University amid 1980-81, Gulbarga University in 1981 and Mysore University in 1977 later Mangalore and Kuvempu Universities in 1991 and 1994 separately began the Ph.D. programme.

A portion of the eminent Studies are in the field to be specific. Mahapatra and Sahoo (2004) demonstrated that there are numerous issues that libraries and librarianship faces because of consistent changes in the calling, and to take care of these issues just research exercises could be a helpful measure. Further to improve the human information base and to grow better propelled instruments and procedure in LIS inquire about aides in achieving such exercises. Research is fundamental as it is a logical technique for enquiry, discovering something, making new information, going past involvement and illuminates the issues. Kannappanavar and Vijayakumar (2000) directed an examination on the event of finishing fifty years of LIS investigate in India and delineated the patterns in research. As indicated by concentrate the year 1992 is the most beneficial year for research yield. Arranging and the executives is the most supported zone for research

by LIS scientists pursued by client contemplates and bibliometrics. Karnataka University and its examination guides are the most gainful college and research controls in the field.

Chandrasekharan and Ramasesh (2009) plainly anticipated the yield of research in India and improvement of doctoral research with important measurable examination. Endeavor in the examination portrayed amount of research yield in the shape doctoral proposals gathered by state, college, subject and director/control and so on. The examination shows zones of research action in LIS with positioning of colleges and states which have contributed look into in India. Wagh (2011) looked into research performed in Library and Information Science In India amid the period 2004-08 and recorded research projects of PhD in LIS did in various colleges in India .The information was investigated and discovered the zones of research getting more consideration or less consideration, development design, profitability of the colleges and directors and so forth.

Garg, Tamrakar and Tamrakar (2009), they announced that the rage for PhD in library science is additionally developing quickly in India, and principle reason is that today the majority of the colleges are requesting for a doctoral qualification in library and data science for resources and for senior experts in college and other higher instructive and inquire about libraries. This prompted an expanded research movement at different library schools in India. Patra and Chand (2006) in their correspondence LIS explore in India directed a bibliometric investigation of LIS look into and uncovered that LIS inquire about yield from India should be flashed at global dimension rather contributing in Indian diaries. In the present paper an endeavor has been made to think about the LIS inquire about in Karnataka State Universities.

### Goals OF THE STUDY

The goals of the investigation are as per the following:

- ♣ To know the development of the doctoral theories in Karnataka.
- ♣ To rank research guides.
- ♣ To recognize the subjects those are lingering behind in LIS explore.
- ♣ To comprehend the commitment by individual colleges in Karnataka towards LIS inquire about; and

### Procedure AND SCOPE OF THE STUDY

The doctoral theories acknowledged by all the six chose colleges in Karnataka in the field of library and data science amid 1980 to 2015 have been taken as a source material. All the data seeing Ph.D propositions, for example, look into researcher, examine manage, title and so on., information was recorded on MS Excel and MS word. The doctoral theories acknowledged by all the six chose colleges in Karnataka in the field of library and data science amid 1980 to 2015 have been taken as a source material.

These aides have guided in subjects of LIS, Automation, Users Studies, Information require, Information recovery, Information Source, Digital Library, Technology, and so forth., they offered there top to bottom learning and data of their subjects to the analysts

### Open library

An open library is a library that is available by the overall population and is commonly supported from open sources, for example, charges. It is worked by bookkeepers and library paraprofessionals, who are additionally government workers. Here the most noteworthy number of proposals have been granted from the colleges of Karnataka State. Karnatak University 8 pursued from Mysore University 2 and Mangalore University1.

### The executives

The executives in organizations and associations is the capacity that arranges the endeavors of individuals to achieve objectives and destinations by utilizing accessible assets productively and effectively. Management incorporates arranging, sorting out, staffing, driving or coordinating, and controlling an association to achieve the objective or target. Resourcing envelops the arrangement and control of HR, monetary assets, mechanical assets, and characteristic assets. The executives is likewise a scholarly control,

---

a sociology whose goal is to examine social association. On this theme additionally just 1 (0.4%) has been awarded from the chosen colleges of Karnataka State. Here additionally just 1 theory has been granted to the Karnataka University.

#### Extraordinary library

An extraordinary library is a library that gives specific data assets on a specific subject, serves a particular and constrained customer base, and conveys specific administrations to that clientele. This is another exploration territory in the field of LIS however because of the absence of intrigue just 1 (0.4%) proposition has been granted from the chosen colleges of Karnataka State. Here just 1 postulation has been granted from the Kuvempu University.

#### Near Study

Near investigation intends to ponder separate at least two things. Around there just 2 (0.7%) have been awarded from the chosen colleges of Karnataka State. Here just 2 proposals have been granted from the Karnataka University 1 and Mysore University 1 individually.

School Libraries, Special Libraries, Library Management are most ignored field in the zone of LIS look into. Subsequently due significance to be given to these regions.

#### Conclusion:

Research is a basic piece of training and instructing in a connected field like LIS, look into is especially essential to the eventual fate of libraries, data access and distributing. In view of the outline of the doctoral research in the Universities in Karnataka it is discovered that the LIS look into in Karnataka is consistently updating as far back as it began. The present investigation uncovers that almost 200% development in the LIS inquire about from 1981 – 1990 to 2001 – 2010 in Karnataka state.
